# Rails Spring 2014

week

# Agenda

- Homework Review

- AR Validations

- RSpec (testing in Rails)

- Developer Talk

# Homewok Review

- 1. What is ActiveRecord and why is it useful?

- 2. What problems could happen if you change a migration file after you have run it and committed it to github? (list 2)

- 3. What problems can you run into with the Rails has_and_belongs_to_many method? (list 2)

- 4. How is Rails form_for object oriented?

- 5. How would I use postgres in production and sqlite for development? What files would I change and how would I change them?

- 6. What is the seeds file? How do I run it?

# Homework Review

- Code:

- Add 2 relationships to your app:

- 1. Has Many (one-to-many)

- 2. Has Many Through (many-to-many)

- Add 2 named scopes

# AR Validations

- demo

# Rspec & Controller

- demo

# Developer Talk

✦ https://speakerdeck.com/kerrizor/5-things-i-wish-someone-had-told-me-about-programming-before-i-started

# Homework

- Reading:
  - Chapter 21: All
  - Active Record Validations: http://guides.rubyonrails.org/active_record_validations.html

- Code:
  - Add 2 spec controller tests and methods
  - Add 1 validation to a model including code and test
